

# Effective design, energy efficient!

Electrolux's range of integrated dishwashers have a stunning design to complement today's modern kitchen.

Fully aligned to the rest of the Electrolux built in range of appliances, the horizontal light bar in the Insight semi-integrated models will give any kitchen that well thought through, co-ordinated feel. This together with a range of special options including Auto-Programme, a programme that automatically decides the correct type of wash required for your load, Electrolux can help further to lighten the load.

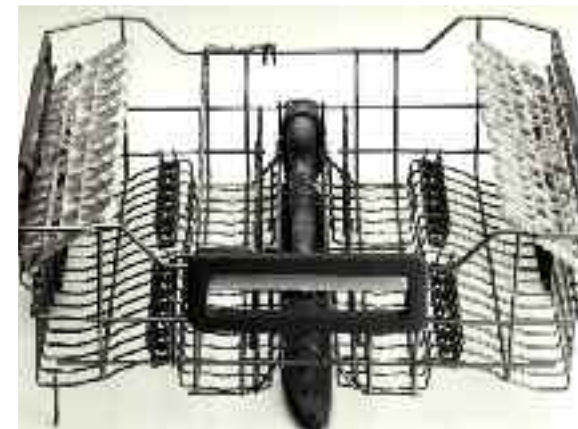

Electrolux dishwashers are all AAA rated, which means they offer you the best wash, dry and energy efficiency performance.

## Did you know:

1. According to research verified by the University of Bonn, the average household will do two or three hand washes a day using 60 litres of water, while a dishwasher typically uses less than 16 litres per wash. (Source: University of Bonn)
2. Washing in a dishwasher is generally more effective (fewer soil 'spots') and more hygienic (lower bacteria count) than by hand. (Source: Defra Market Transformation Programme Updated: 31 Jan 2008)

## Let someone else do the washing up

The Electrolux range of dishwashers can help solve your washing up issues and show you the way to a more comfortable relaxing life. Not only will a dishwasher save you time and give you a more hygienic wash but it will also save you money. Our dishwashers are designed to use less energy and water, which is very important if your water is metered.

Dishwasher Features

Touch controls

Available on some Insight models with an LCD display that scrolls through the programmes indicating programme times and options making operation convenient and easy to use.

Turbo drying

A fan is used to increase air circulation within the dishwasher, to ensure perfectly dry dishes.

Active Drying

An integrated condenser unit activates during the drying cycle and provides a faster, more efficient drying result.

Flexi form baskets and height adjustable upper basket

We were thinking you might appreciate some more flexibility for different sized items so we have designed some of our baskets to have foldable plate racks and foldable cup racks as well as Easy Lift height adjustment, all for making loading and unloading the dishwasher a little bit easier.

Place settings

Electrolux has a range of dishwashers to suit your family size and the space available in your kitchen. Full size dishwashers have 12 IEC place settings, slimline models have 9 IEC place settings and the compact model has 6 IEC place settings.

Red Beam

Electrolux dishwashers are so quiet we have RED BEAM - a small red light shines on to the floor to let you know that the dishwasher is operating.

Range of Programmes

Electrolux has a range of programmes and options which give outstanding wash and dry results. With up to 8 programmes available on top models which include Intensive 70°C and Quickwash 60°C as well as delay start and plate warmers.

Intensive 70°C

Perfect for difficult items such as heavily soiled pots and pans, this programme has a high temperature wash which ensures perfectly clean items.

Auto programme

This programme is so easy to use, just select the automatic programme and go. The energy consumption and duration of the programmes are adjusted accordingly to how dirty the items are. Always delivers an economical and outstanding result.

Quickwash 60°C

Delivers an 'A' rated wash performance at 60°C for a freshly soiled load and it's complete in just 30 minutes. Ideal for small loads or when entertaining.

Glass care 45°C

This programme is perfect for your fine wine glasses. It operates at 45°C, perfect for handling these delicate items.

Rinse & Hold

Give your dishes a quick cold rinse, before the dishwasher is fully loaded. This eliminates unpleasant odours and uses your dishwasher economically.

Plate warmer

This programme is designed to heat your plates before serving, but at the same time removes dust from dishes which have not been used for a long time.

Talkie

Voice guided operation saves you time referring to the instruction manual and provides information on the wash programme selected.

# Modern life is hectic.

There is so much to do. There are families, friends and career. There are movies, theatres, concerts and art galleries. Or perhaps you are into reading books, or visiting the gym.

How will you get time for all the things you enjoy doing? At Electrolux we have the solution if time is your problem. Our washing machines are there to make your life easier so that you will get time for the things you really want to do. We were thinking of you when we made them.

## **Time Manager - puts you in control of your time.**

For those of you who are looking to control more of your time, we have the Time Manager washing machine. This function allows you to decide the time your wash takes, not the machine. The large LCD display informs you how your clothes can be washed. Just select the temperature and you choose the time and press start. We were thinking it really is that easy!

We offer a wide range of washing machines to meet all your needs and requirements. All models have a smart design and a large porthole door with wider opening for easy unloading. The wash capacity is 6kg (4kg for drying programmes).

## **Tailored programmes**

It is important to tailor the wash programmes to your needs, so our washing machines or washer dryers are the ideal choice. These models have 1200rpm-1400rpm spin speeds and Direct Spray wash technology which showers clothes for a more economical wash whilst giving an A+ rated wash performance.

The push buttons make it easy to select the options you require. Spin reduction and rinse hold both help to reduce creasing, making ironing easier. Pre-wash, quick wash or intensive wash can be selected depending upon how soiled the garments are.

## **A further time saving feature**

To save you even more time, when you want to wash and dry a half load, we have included a "wash-to-dry" facility. Simply select the programme required, set the drying time, press the on button and relax. You're free to do whatever you want until your clothes are ready to put away, clean and dry.

## Do your laundry the easy way.

Fully integrated laundry appliances are the finishing touch for your kitchen, discreetly hiding an important appliance behind a furniture door. You can choose between a washing machine or if space saving is important to you, a combined washer dryer.
